9.	Summary of Opinions	13

1. INTRODUCTION

My name is Henry Miller, Ph.D. I am a Managing Director in the Health Analytics practice of Berkeley Research Group, LLC. I have been working on health care cost and health insurance issues for more than fifty years. I have conducted studies on these issues for the federal Medicare program, several state Medicaid programs and more than forty health insurers. I have testified on these issues in the U.S. Congress, several State legislatures and in federal, state and local courts and in arbitrations. My curriculum vita is attached to this report as Appendix A. My firm is compensated at \$825 per hour for my time on this matter and payments are not contingent upon the outcome of the matter.

2. BACKGROUND OF THE CASE

This case relates to the injury of Richard Sparks ("Plaintiff"). Plaintiff suffers from Parkinson's disease and related medical conditions allegedly due to water contamination at the Marine Corps Base Camp Lejeune.¹ Plaintiff currently resides in Denver, CO.² A Life Care Plan has been prepared for Plaintiff by Michael A. Fryar, M.S., RN, CRC, CCM, CLCP, QRP, that describes the services that Fryar believes will be needed for the Plaintiff throughout his life expectancy. A Life Care Plan was also prepared by Michael Shahnasarian, PhD, that includes modifications to Fryar's Life Care Plan and services that Dr. Shahnasarian believes will be needed for the Plaintiff throughout his life expectancy.

3. SCOPE OF REPORT

I was asked by the Department of Justice to apply my expertise in health care costs to the matter of Richard Sparks v. United States of America, which is part of the Camp Lejeune Water Litigation in the United States District Court for the Eastern District of North Carolina. I was specifically asked to address the following issues related to Plaintiff:

- Analyze the projected health care costs identified by Michael A. Fryar, M.S., RN, CRC, CCM, CLCP, QRP,³ (Fryar's Life Care Plan) and identify the amount that would be paid by Medicare and the Veterans Health Administration for Plaintiff; and
- Analyze the projected health care costs identified by Michael Shahnasarian, PhD,⁴ (Shahnasarian's Life Care Plan) and identify the amount that would be paid by Medicare and the Veterans Health Administration for Plaintiff.

¹ Life Care Plan for Mr. Richard Sparks, prepared by Michael A. Fryar, M.S., RN, CRC, CCM, CLCP, QRP, dated February 1st, 2025.

² Life Care Plan for Richard Sparks, prepared by Michael Shahnasarian, PhD, dated May 8th, 2025.

³ Life Care Plan for Mr. Richard Sparks, prepared by Michael A. Fryar, M.S., RN, CRC, CCM, CLCP, QRP, dated February 1st, 2025.

⁴ Life Care Plan for Richard Sparks, prepared by Michael Shahnasarian, PhD, dated May 8th, 2025.

4. MEDICARE COVERAGE

Based on information received from counsel, it appears that Plaintiff receives coverage for healthcare services through the Medicare program (Part A and Part B).

Medicare Part A, which covers institutional services (e.g., hospital services), has no cost. There is a premium for Part B (e.g., physician and other professional services). The standard Part B premium amount in 2025 will be \$185 per month (\$2,220 annually).⁵ In addition, beneficiaries can elect to enroll in optional Medicare Part D coverage, which covers brand-name and generic prescription drugs.

5. VETERANS HEALTH ADMINISTRATION COVERAGE

Based on information received from counsel, it appears that Plaintiff also receives coverage for healthcare services through the Veterans Health Administration ("VHA"). Eligibility for VHA healthcare benefits is based on military service for a certain period of time. Other requirements must also be met, such as service in certain geographic areas, military conflicts, wars and/or exposure to toxins or other hazards while serving.⁶

Basic VHA health benefits cover preventive care, such as health exams and immunization, inpatient hospital services, urgent and emergency care, assisted living and home health care, and prescriptions. Some veterans may receive additional benefits such as dental care.⁷

6. METHODOLOGY FOR CALCULATION OF COSTS

To determine the rate paid by Medicare, I first identified if each service/supply, included in the life care plans submitted by the plaintiff and the defense, was covered under the benefits offered by Medicare. Some services/supplies such as home cleaning services are not covered by Medicare. Next, I identified the rate that would be paid by Medicare for a service/supply. Medicare rates exclude any patient responsibility, including coinsurance.

To determine the rate paid by the VHA, I first identified if each service/supply, included in the life care plans submitted by the plaintiff and the defense, was covered under the benefits offered by the VHA. The VHA pays providers at a rate equal to the Medicare rate should a Medicare rate exist. For those services not covered by Medicare and without a Medicare rate, I followed the methodologies outlined on the VHA's website to identify the rate paid. Sources for Medicare and VHA rates are listed in Appendix B of this report.

Plaintiff can elect to use either VHA or Medicare for the coverage of their healthcare services (depending on the provider's participation in those programs).⁸ For most general medical services and outpatient care, Medicare will pay 80% of the approved Medicare rate and a patient will pay the

⁶ Eligibility for VHA health care, available at: <https://www.va.gov/health-care/eligibility/>.

⁷ How to get veterans health benefits, available at: <https://www.usa.gov/get-veterans-health-benefits#:~:text=What%20do%20VA%20health%20benefits,Prescriptions>.

⁸ VA health care and other insurance: available at: <https://www.va.gov/health-care/about-va-health-benefits/va-health-care-and-other-insurance/>.

remaining 20% as coinsurance.⁹ According to the VA fee schedule, the “VA reimburses hospital, medical, and extended care services up to the maximum allowable rate which for most services is the Medicare rate”.¹⁰ Two rates have been provided in Tables 1 and 2 to identify the difference between what Medicare and the VHA would pay for established Medicare-approved amounts. The amount that will be paid will be determined based on where Plaintiff seeks medical care.

7. SUMMARY OF COSTS BASED ON MEDICARE AND VHA COVERAGE FOR FRYAR’S LIFE CARE PLAN

Plaintiff’s future service unit costs based on Medicare and VHA coverage for Fryar’s Life Care Plan are summarized in Table 1 below. Rates reflect standardized rates for what Medicare and VHA would pay for a service, removing patient responsibility amounts such as copayments and coinsurance. According to Plaintiff’s Veterans Benefits Administration (“VBA”) documentation, Plaintiff has a service-connected disability rating of over 70%, meaning that copayments do not apply for many services through the VHA, such as care related to a service-connected injury.¹¹

Fryar states that according to Dr. Heidi Schwarz, Plaintiff’s anticipated life expectancy is an additional 5.5 years due to Parkinson’s Disease and his cardiovascular history (76.5 years, or 5.5 years from 2025 and the date of my report).¹²

		(combined with skilled nursing)			
Skilled Nurse Care (Licensed Practical Nurse [LPN] or Registered Nurse [RN] Home Visit)	1 time per week	Hourly rate, cannot exceed 28 hours per week for Medicare coverage (combined with CNA)		\$231.32	\$231.32
FACILITY CARE					
Skilled Nursing Facility	Monthly provision				
SNF 1-100 days		Daily Rate (assisted living facility not covered)		\$403.58	\$475.65
SNF 100+		Daily Rate (assisted living facility not covered)		Not covered beyond 100 days	\$415.51
RESIDENTIAL MODIFICATIONS					
Future Home Modifications (Wheelchair Accessibility)	1 time provision			\$0.00	\$6,800

*Based on Fryar's Life Care Plan.¹³

¹³ Life Care Plan for Mr. Richard Sparks, prepared by Michael A. Fryar, M.S., RN, CRC, CCM, CLCP, QRP, dated February 1st, 2025.

8. SUMMARY OF COSTS BASED ON MEDICARE AND VHA COVERAGE FOR SHAHNASARIAN'S LIFE CARE PLAN

Plaintiff's future service unit costs based on Medicare and VHA coverage for Shahnasarian's Life Care Plan are summarized in Table 2 below. Rates reflect standardized rates for what Medicare and VHA would pay for a service, removing patient responsibility amounts such as copayments and coinsurance. According to Plaintiff's Veterans Benefits Administration ("VBA") documentation, Plaintiff has a service-connected disability rating of over 70%, meaning that copayments do not apply for many services through the VHA, such as care related to a service-connected injury.¹⁴

Dr. Shahnasarian does not explicitly include a life expectancy in his report. Therefore, the life expectancy from Fryar's Life Care Plan of 5.5 additional years was used (76.5 years, or 5.5 years from 2025 and the date of my report).¹⁵

¹⁴ Current VA health care copay rates for 2025, available at: [https://www.va.gov/health-care/copay-rates/#:~:text=in%20a%20hospital\)-,If%20you%20have%20a%20service-connected%20disability%20rating%20of%2010,a%20copay%20for%20inpatient%20care.](https://www.va.gov/health-care/copay-rates/#:~:text=in%20a%20hospital)-,If%20you%20have%20a%20service-connected%20disability%20rating%20of%2010,a%20copay%20for%20inpatient%20care.)

¹⁵ Evaluation on behalf of Richard Sparks, prepared by Michael A. Fryar, MS, CLCP, CRC, RN, CCM, QRP, dated February 1st, 2025.

9. SUMMARY OF OPINIONS

This report is based on information known to me as of this date. I have analyzed the information provided to me for the Plaintiff and assessed publicly available data to arrive at my opinion as to the rates for care covered by the Plaintiff's insurer. If additional information is made available, I may modify my report. I may also be asked to present opinions on additional issues in this case.

A handwritten signature in black ink, appearing to read "Henry Miller", with a checkmark at the end. The signature is written in a cursive, somewhat stylized font.

SUMMARY

Henry Miller is Managing Director, Health Analytics in the Phoenix, AZ office of the Berkeley Research Group. He has more than 50 years of experience as a healthcare consultant and researcher specializing in health care finance, public policy, regulatory analysis, and strategic planning. In addition, he has provided expert testimony to the U.S. Congress, several state legislatures, in Federal, State, and local courts and in arbitration proceedings.

Dr. Miller has worked with more than 50 health plans, including some of the largest plans in the U.S., Blue Cross and Blue Shield plans and regional health plans on varied aspects of their operations, including evaluation of premium rate setting strategies, medical loss ratios, administrative issues, organizational structure, community relations, network management, provider payment systems, operating systems, and strategic planning.

Dr. Miller has worked on provider payment systems and network management issues for more than forty years. He was a member of the Medicare oversight committee for the effort to develop the practice expense component of the RBRVS physician fee schedule. He assisted CMS on several projects related to the development of the Medicare Hospital Outpatient Prospective Payment System and directed a project to assess opportunities to improve the Medicare Inpatient Prospective Payment System (IPPS) based on DRGs. Dr. Miller also directed the Medicare program's evaluation of the appropriateness of paying a facility fee to ambulatory surgery centers and has prepared reports on reimbursement issues for the Medicare program that were responses to Congressional requests.

He has designed hospital, physician, and pharmaceutical payment systems for seven Medicaid programs and more than thirty Blue Cross and Blue Shield plans and other health plans. This work has included both in network and out of network payment. In several instances, Dr. Miller negotiated provider contracts on behalf of health plans.

Dr. Miller has worked with various entities on developing competitive bidding programs, including design of Requests for Proposals, and bid evaluation formats. This work focuses on bids for health coverage submitted to employers by health insurers. He has also assisted health insurers who submitted bids for health coverage to private sector and government entities.

Dr. Miller has provided expert testimony on the reasonable costs of medical care, medical payments and network management issues in worker's compensation and personal injury cases. This testimony was

based on the methods to measure reasonable value of medical care that Dr. Miller developed. Methods have been accepted in state and Federal courts.

Dr. Miller's work for health plans includes several assignments relating to the operation of Medicare Advantage plans, including issues relating to data submission to the Medicare program, provider contracting, and the development of provider payment approaches and rates. He has also worked for the Medicare program on these issues, especially as related to the quality and availability of data that is submitted by MA plans to the Federal government.

Dr. Miller has directed several public policy and regulatory analysis projects. He has directed evaluations of several programs for the Department of Health and Human Services, including programs managed by the Office of Women's Health, the Health Resources and Services Administration (HRSA), the National Center for Health Statistics, the Agency for Healthcare Research and Quality (AHRQ) and the National Institutes of Health. Much of this work focused on delivery and financing alternatives for improving care to vulnerable populations. He directed a project that investigated innovative approaches to care management initiated by Federally Qualified Health Centers. This project examined programs in nine U.S. communities. He directed studies of research on access to care for disadvantaged, minority, and disabled populations for AHRQ. In other work, he developed a strategic plan for a managed care plan for the uninsured and low-income populations in Hillsborough County, Florida and designed an innovative delivery system for low-income populations in Rochester, New York. His work for HRSA includes evaluations of health care for the homeless programs as well as several federally funded women's and maternal and child health programs. He has conducted similar projects for New York State. Dr. Miller directed an evaluation of the Medicare clinical laboratory payment system for the National Academy of Medicine. He conducted an evaluation of the impact of Medicare regulations on clinical laboratories for the American Clinical Laboratory Association as well as national laboratory chains and hospital-based laboratories.

Dr. Miller directed key elements of the work conducted by the Governor's Commission for Rationalizing Healthcare in New Jersey. He was the lead consultant to the Commission on analyzing the financial status of the State's hospitals as well as measuring the impact of potential hospital closings. He also served as the economic advisor to the Alaska Department of Insurance in its review of the application by Premier Blue Cross to convert to for-profit status. He assisted several Primary Care Trusts and Strategic Health Authorities in the U.K. as they addressed changes in National Health Service requirements.

Dr. Miller has directed several technology related projects, including work in which he presented new technologies to the Centers for Medicare and Medicaid Services (CMS) to obtain their approval and payment. This work included analysis of a radiotherapy for non-Hodgkins lymphoma, a new device for the treatment of posterior uveitis and a cryogenic stent. In addition, he prepared the strategic plan for a Regional Health Information Organization (RHIO) for the Maryland and Virginia area. This work included an assessment of the feasibility of linking electronic medical records across hospitals and physicians' offices.

Dr. Miller developed resource costing, a tool for the measurement of costs in healthcare settings in a series of projects completed for the Office of the Assistant Secretary for planning and Evaluation of the Department of Health and Human Services. He applied resource costing to a project for the Medicare Payment Advisory Commission (MedPAC) in which he used the approach to assess the accuracy of Medicare Cost Reports as a research and policy analysis tool and to another project to measure the

costs of more than 300 hospital outpatient procedures to support efforts by the Centers for Medicare and Medicaid Services (CMS) to develop the Medicare Hospital Outpatient Prospective Payment System (HOPPS) based on APCs.

PROFESSIONAL EXPERIENCE

Provider Payment System Design and Evaluation

Dr. Miller played a key role in the development of the Medicare Hospital Outpatient Prospective Payment System (HOPPS). In this work for CMS, he conducted a major pricing study, analyzed the impact of key aspects of the APC approach and assisted in drafting regulations. Subsequently, he conducted a study of the impact of the HOPPS on the quality of care provided to Medicare beneficiaries for MedPAC. Dr. Miller also designed hospital outpatient payment systems for Medicaid programs in New York, New Jersey, North Dakota, and the District of Columbia. He has developed hospital outpatient payment approaches for Blue Cross and Blue Shield plans in New York, New Jersey, Virginia, Georgia, Arkansas, Minnesota, and California.

Dr. Miller also directed an assessment of opportunities to improve the Medicare Inpatient Prospective Payment System (IPPS), based on DRGs. He has designed or evaluated hospital inpatient payment systems for Medicaid programs in Virginia, Pennsylvania, Iowa, New York, and West Virginia. His inpatient payment system design work for health plans includes projects conducted for Blue Cross and Blue Shield plans in Virginia, Pennsylvania, Florida, Texas, North Dakota, Illinois, Colorado, Kansas City and Tennessee. Dr. Miller also evaluated the method used by the Federal government to pay children's hospitals for their investment in medical education.

Dr. Miller completed a study to update the payment system used by the Medicare program to pay Federally Qualified Health Centers (FQHCs). This work was undertaken to address payment issues that arose because payment levels had not been adjusted other than for inflation for more than fifteen years. Recommendations were made to the Health Resources and Services Administration and the Centers for Medicare and Medicaid Services.

Dr. Miller has worked with several State Medicaid programs on home health agency payment systems. He reviewed licensing criteria for home health agencies and other providers in Vermont and New York. He led the design of nursing home reimbursement systems for the Medicaid programs in Virginia, Pennsylvania, Vermont, and Iowa. He directed a study of the Medicare laboratory fee schedule for the National Institute of Medicine. His reimbursement system design work for health plans includes design of systems to pay hospitals, ambulatory surgery centers, physicians, nursing homes, home healthcare agencies, dialysis centers and other providers. He has also developed fee schedules used for out of network payment for several large health plans. He has worked with more than two-thirds of the nation's Blue Cross and Blue Shield plans as well as national health plans on reimbursement issues.

In other work, Dr. Miller evaluated and made recommendations to improve the payment methods used by worker's compensation programs in Ohio and California. He completed a study of access to healthcare for injured workers in California. Dr. Miller has also worked with personal injury insurers on methods used to pay medical claims.

Public Policy and Regulatory Analysis

Dr. Miller has directed several major studies of key public policy issues for the Federal government as well as for states and private sector clients. Examples of this work include:

- Economic advisor to the Alaska Insurance Department on the application by Premier Blue Cross to convert to for-profit status,
- Financial advisor to the Governor's Commission for the Rationalization of Healthcare in New Jersey,
- Consultant to several U.K agencies on development of responses to changes in the National Health Service, including Yorkshire and the Humber Strategic Health Authority, North Lincolnshire Primary Care Trust, Calderdale Primary Care Trust, and the Swansea Primary Care Trust,
- Analysis of the Highmark Blue Cross and Blue Shield and Independence Blue Cross proposal to merge,
- Validation of the diagnostic information used in the CMS-RCC risk adjustment formula used by the Medicare program to develop payment rates for Medicare Advantage plans,
- Analysis and recommendation of innovative approaches to improve access to primary care services for low-income populations for the Greater Rochester Health Foundation,
- Evaluation of the Rural and Frontier Coordinating Center program of the Federal Office of Women's Health,
- Evaluation of the costs and use of case management in a home health care program funded by the Federal government,
- Evaluation of the impact of the New York State All-Payer Case-Based Prospective Hospital Reimbursement System (NYPHRM) for the Council on Health Care Financing and the New York State legislature,
- Evaluation of several Federal and New York State programs to provide services to people with HIV/AIDS,
- Development and evaluation of community-based healthcare data systems, including a data system to collect and manage data that describe health care markets for the Agency for Healthcare Research and Quality, the Maryland Medical Care Database for the Maryland Health Care Commission and the database used to support hospital quality initiatives by the American Data Network,
- Evaluation of the Healthcare Community Access Program (HCAP), a national effort to reduce uncompensated care in over 150 communities for the Health Resources and Services Administration,
- Evaluation of the Federal Government's Black Lung Clinics program, and
- Completion of several projects for the National Center for Health Statistics including an assessment of the impact of using ICD-10 for diagnosis coding, an evaluation of the uses of provider surveys including the National Hospital Discharge Survey and the National Ambulatory Medical Care Survey and the design of a national survey of ambulatory surgery.

Strategic planning

Dr. Miller's strategic planning work includes assignments completed for hospitals, managed care companies, major employers, and government agencies. These projects include:

- Support on strategic issues for several hospital systems, including Johns Hopkins Medicine, University of Rochester Health System, University of Maryland Medical System, The Christ Hospital, Sutter Health System, and Memorial Hermann Health System.
- Evaluation of health benefits options for major employers including AT&T and Verizon,
- Preparation of a strategic and operational plan for an innovative managed care plan for the uninsured in Hillsborough County, Florida,
- Support for the preparation of the initial Vermont Health Resources Allocation plan for the Vermont Bureau of Insurance, Securities and Health Care Administration,
- Support to the State of New York for the development of a Global Budgeting program, and
- Several studies of the comparative value of health care benefit programs provided by health plans in efforts to identify optimal arrays of benefits.

Expert Testimony

Dr. Miller has served as an expert witness in several health care cases in recent years and has testified in federal and state courts, in arbitrations and in administrative hearings. His testimony addressed:

- Hospital/health plan contract disputes,
- Role of the Affordable Care Act in measuring medical costs in personal injury cases,
- Reasonable costs of medical care in personal injury cases,
- Class action certification,
- Out of network provider payment,
- Rates paid to health care providers by worker's compensation insurers and personal injury insurers,
- Medicare and Medicaid managed care contracts,
- Health plan operations and health plan/provider relationships,
- Health care competition issues,
- Applications by non-profit health insurers seeking to convert to for-profit status, and
- Efforts to obtain certificates of need for health care services.
